Between 2011 and 2016, the population in the area grew by **3.3%**.

The immigrant population increased by **14.3%**.

Total population: **465,769 → 481,172**

Immigrant population: **112,125 → 128,149**

**Number of immigrants living in Long Beach in 2016:**

**128,149**

Without an increase in the foreign-born population, the area’s overall population would have decreased by **621** people.

Top five countries of origin for immigrants living in the area:

1. Mexico .................. 47.5%
2. Philippines ................ 10.6%
3. Cambodia .................. 7.8%
4. El Salvador ................ 5.2%
5. Vietnam .................... 2.8%
Given their income, immigrants contributed significantly to state and local taxes, including property, sales, and excise taxes levied by state or municipal governments.

<table>

<tr>
<th>Amount earned by immigrant households in 2016: $3.4B</th>
</tr>
</thead>
<tbody>
<tr>
<td>$833.4M went to federal taxes.²</td>
</tr>
<tr>
<td>$280.7M went to state and local taxes.³</td>
</tr>
</tbody>
</table>

Leaving them with $2.3B in spending power.

This means that foreign-born households held 29% of all spending power in Long Beach, more than their share of the area’s overall population.⁴

Immigrants in Long Beach also support federal social programs. In 2016, they contributed $331.8M to Social Security and $84.3M to Medicare.

New Americans in Long Beach

In 1978, after receiving a computer science degree from American University in Washington, D.C., Pasin Chanou knew that he could not return to his native Cambodia. Three years earlier, the Khmer Rouge had brutally gained power and threatened his family’s gemstone business. His parents feared for their lives and fled to Thailand. “There was no hope of going back, and my father told me I needed to make a life in America,” he says. “I made up my mind to do whatever it would take to succeed here.”

By that time, a steady flow of Cambodian refugees had made their home in Long Beach. So Chanou and his Cambodian fiancée, whom he’d met in college, moved to southern California. Chanou was hired as a computer analyst at McDonnell-Douglas, the aerospace manufacturer that later merged with Boeing. He spent 32 years at the company, where he worked on military cargo aircrafts. “I was so proud to play a role in contributing to such important projects, like launching commercial and military communications satellites into space,” says Chanou, who earned an MBA from Pepperdine University in 1993. His two sons followed in his footsteps and became engineers.

After retiring in 2011, Chanou shifted his focus to community work. He became chairman of the board for Cambodia Town, a 1.2-mile business and cultural district that features ethnic restaurants and retailers. In 2015, he worked with the City of Long Beach to create a business improvement district that funds a security guard and sidewalk maintenance and helps underwrite a cultural festival that now attracts two thousand visitors annually.

Chanou’s mission for Cambodia Town is to celebrate immigrants’ economic contributions to Long Beach. “Instead of going to college, many Cambodian refugees became entrepreneurs,” he says, pointing to the restaurants, jewelry stores, beauty salons, grocery stores and tailoring businesses they run. “They’re also famous for their donut shops,” he says. Cambodians in Long Beach faced a rough transition, Chanou says, because of local skepticism toward the influx of refugees. But they have become essential to the area’s identity and native Californians have embraced them. “We are a success story of integration. We are a proud part of Long Beach,” he says.

Labor Force Growth

Although the foreign-born made up 26.6% of the area’s overall population, they represented 32.6% of its working-age* population, 32.1% of its employed labor force, and 22.8% of its STEM** workers in 2016.

* Working-age refers to people ages 16-64 years old.
** Science, Technology, Engineering, and Math

Immigrants play a critical role in several key industries in the area. This includes:

- General Services: 47.4%
- Accommodation and Recreation: 36.8%
- Transportation and Warehouse: 34.6%
- Professional Services: 34.5%

Because of the role immigrants play in the workforce helping companies keep jobs on U.S. soil, we estimate that, by 2016, immigrants living in the area had helped create or preserve 5,895 local manufacturing jobs that would have otherwise vanished or moved elsewhere.

Pasin Chanou
Chairman, Cambodia Town
and Retired Systems Developer,
The Boeing Company

NATURALIZATION

Share of immigrants in Long Beach who were naturalized citizens in 2016. This constitutes **62,222** immigrants.

Share among the 65,297 non-citizens in Long Beach who were potentially eligible for naturalization. This constitutes **24,628** immigrants.
For Josefina Cruz-Molina, who was 14 when her family fled increasing violence in El Salvador, moving to a new country was especially difficult. The daughter of an engineer, she had a comfortable life in San Salvador and a close-knit group of friends. But when a classmate of her younger brother was kidnapped at his school, the family realized they couldn’t stay. “Leaving everything I knew to come here and start again with a new language was really hard, but I know my parents didn’t have a choice,” she says.

Cruz-Molina’s uncle, a U.S. citizen, petitioned the government to give her family legal residency. They settled in Long Beach, where her father became a loan officer with Opportunity Fund, a microfinance organization, and her mother became a certified nursing assistant. Cruz-Molina focused on mastering English and, after high school, worked her way from Long Beach City College to the University of California at Riverside, where she majored in psychology.

After graduating, she interned with the Community Hispanic Association, a non-profit social service agency that assists local low-income Hispanic youth and families. There Cruz-Molina found her calling: to help other immigrants become vibrant members of the Long Beach community. “I’ve met so many hard-working people who need to know how to navigate the immigration system,” she says. “They just want the chance to contribute to society.”

Last year, Cruz-Molina became a fulltime immigration case manager, guiding clients through residency and citizenship applications. She’s especially passionate about helping young Dreamers renew their work permits. “We didn’t choose our path as children,” she says. “But we have a responsibility to make a bright future. I want to help people realize their full potential.”

Cruz-Molina and her brothers, who are both engineering students, are now U.S. citizens—a testament to their perseverance. “Some people believed it would be too hard to adjust to a new country, but I proved them wrong,” she says. “I was very lucky, and I’m grateful for the opportunities I’ve been given.”

**Median income of refugees in Long Beach, 2016:**

$49,400
UNDOCUMENTED IMMIGRANTS

Number of undocumented immigrants in Long Beach in 2016:

30,775

Share of immigrants who were undocumented:

24.0%

Top countries of origin for the undocumented immigrants in the area:

1. Mexico ................. 66.7%
2. Philippines ............. 6.8%
